DETAILED ACTION

Allowable Subject Matter

Claims 2-9, 11-17, 22-26 and 36 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claim 2, the prior art of record, taken alone or in combination, fails to disclose or render obvious a fiber optic coil wound about a central axis in alternating opposing winding directions, the winding having a pitch angle selected to result in a phase shift of circularly polarized light, said shift caused by Berry's phase with a length of fiber in a region where the winding direction changes being substantially smaller than the length of the fiber in either of the opposing winding directions, in combination with the rest of the limitations of claim 2.

As to claim 22, the prior art of record, taken alone or in combination, fails to disclose or render obvious a fiber optic coil helicoidally wound in alternating opposing winding directions, with a length of fiber in a region where the winding direction changes being substantially smaller than the length of the fiber in either of the opposing winding directions, in combination with the rest of the limitations of claim 22.
